```
# Summary of Code by Pedro Yanez:
# It allows to query your own big corpus, using query api.
# Install libraries
# Import langchain, embedding and vectorizing functions
# Indicate openai personal key
# 959 pages pdf "Handbook of Conflict Resolution" is transformed to corpus, as .txt, using the webpage https://www.sketchengine.eu/
# communicate and allow google colab to access my google drive
# load pdf. First loaded an extract then tried to load entire file. Through trial and error I realized: I can only load small files, beause o
# to embeddings when files exceed certain amount of tokens.
# Also I realized is not possible to vectorize more than two files per minute because of restriction related to tokens allowed to vectorize p
# For this reason, the big file Handbook of Conflict Resolution.txt, is converted to many small files. Each file has 300 lines and the files
# are called small file 300 , small file 600, small file 900, and so on, until small file 38700.
# each file , doing a for loop starting in 300 to 600  to 900 and so on, are loaded and then vectorized. There is a sleep of 30 seconds, to m
# two files per minute and loaded and vectorized. In this way, it doesn't fail due to restrictions related to size of file, or amount of file
# per minute.
# The query "who is ellen raider", answers "I don't know" before the loading of the entire corpus.
# After the loading of the corpus, the query brings the answer.
```

```
pip install langchain

CHAPTER ONE

Cooperation and Competition
Morton Deutsch

ome time ago, in the garden of a friend's house, my five-year-old son and
his chum were struggling over possession of a water hose. (They were in
conflict.) Each wanted to use it first to water the garden. (They had a competitive orientation.) Each was trying to tug it away from
were crying. Each was very frustrated, and neither was able to use the hose to
sprinkle the flowers as he had desired. After reaching a deadlock in this tug-ofwar, they began to punch one another and call each oth
of their competitive approach, the conflict took a destructive course for both of
